ioi ERP for industry

Industry 4.0 is your key to the future.

You are a manufacturer, ioi is an ERP with powerful, enterprise-grade capabilities, including:

- ▶ JIT planning engine
- ▶ Real-time **Gantt Chart**
- ▶ **Master Schedule**

Advanced capabilities include:

- ▶ **Quality management** (non-conformities, deviations, and more)
- ▶ **Quality control** and metrology
- ▶ **PLM** (Product Life Management)
- ▶ **Product configurator**, for both internal users and customer self-service access

If you require custom developments, API interfaces are available across all modules. These **APIs** follow the highly efficient **JSON/REST** standard, making integration with third-party systems straightforward.

- ▶ Integration with digital weighing scales
- ▶ Measurement data acquisition
- ▶ Interface with automated storage systems (such as Kardex)

Integrated E-shop B2B.

Your business customers can conveniently place their orders online through the integrated B2B e-shop.

A COMPLETE DEVELOPMENT ENVIRONMENT INCLUDED:

- ▶ Add custom fields without coding
- ▶ Insert custom back-end and front-end scripts
- ▶ Visual report designer
- ▶ Integrated Business Intelligence (BI) tools
- ▶ Complete development framework included

AN INTEGRATED WEB SERVER:

- ▶ Integrate your website directly with the ERP
- ▶ Integrated visual website design studio
- ▶ Develop custom web interfaces for your customers
